

Methodological quality of the included studies (MMAT 2018)

Screening questions S1–S2 were met by 83 of 84 studies. 'Can't tell' means the study did not report enough to judge — it is a reporting failure, not a design failure.

(a) Overall appraisal by MMAT category

(b) Item-level appraisal within each MMAT category

■ Yes — criterion met ■ Can't tell — not reported ■ No — not met
